

Spring Boot Web

Adding Web Support

- Web Starter
- Security Starter

Packaging

- Standalone Tomcat
- Embedded Tomcat

Test Support

```
@SpringBootTest(webEnvironment = WebEnvironment.RANDOM_PORT)
public class SampleWebJspApplicationTests {

    @Autowired
    private TestRestTemplate restTemplate;

    @Test
    public void testJsp() {
        ResponseEntity<String> entity = this.restTemplate.getForEntity("/", String.class);

        assertThat(entity.getStatusCode()).isEqualTo(HttpStatus.OK);
        assertThat(entity.getBody()).contains("welcome");
    }
}
```

Overriding Default Configurations

- Using `application.properties`
- Using explicit configuration
